TICKETSOURCE

THE **FREE** ONLINE BOX OFFICE SOLUTION...

TicketSource is the easy to use event ticketing system which seamlessly integrates your internet and in-house ticket sales.

Sell tickets online, in person and over the phone using our simple online box office solution.

The box office system is web based and entirely self service putting you in complete control of your events and ticket allocations at all times.

You could be up and running with your first event listed in less than 10 minutes... Simply sign up to get started today!

Mobile Tickets

Our mobile ticket delivery option is popular with event organisers and customers alike. There is no charge to the event organiser to send mobile tickets and a fee of only £0.50 to customers choosing this option.

Mobile tickets include the unique booking reference and bar-code for you to validate on the door against your Front of House sheet or scan using our bar-code scanning solution, TicketSource Express.

Electronic Tickets

When customers book online we email them an 'e-ticket'. The customer prints this on A4 paper and brings it with them to the event.

You choose whether to treat that printout as a ticket in its own right or just as a receipt to exchange on arrival for your preferred ticket type.

There is no additional charge for customers who opt to print their e-ticket.

Thermal Tickets

Our Standard Post option is ideal for customers who don't have readily available access to a printer or mobile phone, or would simply like to present the tickets as a gift to someone else.

Customers choosing to receive their tickets by Standard Post, pay an additional £1.50 to have their tickets produced and dispatched to them directly from Ticket-Source.
